Anchore Container Vulnerability Report (T0) 560

⋮

Path	Details ↑	Baseline
▾ ANCHOREVULN_localbuild/testimage:latest_CVE-2004-0971_deb_libgssapi-krb5-2_1.18.3-6 8		
 dockerfile /var/lib/... /status	The path /var/lib/dpkg/status reports libc-bin at version 2.31-13 which is a vulnerable (deb) package installed in the container	Unchanged
 dockerfile /var/lib/... /status	The path /var/lib/dpkg/status reports libc6 at version 2.31-13 which is a vulnerable (deb) package installed in the container	Unchanged
 dockerfile /var/lib/... /status	The path /var/lib/dpkg/status reports libgcrypt20 at version 1.8.7-6 which is a vulnerable (deb) package installed in the container	Unchanged
 dockerfile /var/lib/... /status	The path /var/lib/dpkg/status reports libgnutls30 at version 3.7.1-5 which is a vulnerable (deb) package installed in the container	Unchanged
 dockerfile /var/lib/... /status	The path /var/lib/dpkg/status reports libgssapi-krb5-2 at version 1.18.3-6 which is a vulnerable (deb) package installed in the container	Unchanged
 dockerfile /var/lib/... /status	The path /var/lib/dpkg/status reports libk5crypto3 at version 1.18.3-6 which is a vulnerable (deb) package installed in the container	Unchanged
 dockerfile /var/lib/... /status	The path /var/lib/dpkg/status reports libkrb5-3 at version 1.18.3-6 which is a vulnerable (deb) package installed in the container	Unchanged
 dockerfile /var/lib/... /status	The path /var/lib/dpkg/status reports libkrb5support0 at version 1.18.3-6 which is a vulnerable (deb) package installed in the container	Unchanged
